

APPREHENSION
English Manufacturers Will
Cut Short Show
DON'T LIKE OUR TARIFF
Our People Might Copy and
Out Sell Them

New York, May 11.—Apprehension that American manufacturers will copy the new ideas in British exhibits of industries and machinery at the St. Louis exposition and then, by the aid of the tariff, undersell them in America, may prevent the British industrial exhibit at St. Louis from being as expected, says Colonel Watson, secretary of the British commission to the St. Louis exposition, who arrived on the Ionia today on his way to St. Louis. He said: "I can not say very much about our exhibit at St. Louis. The reason is because of your high tariff. There is a disposition to hold back, and there is not only so in my country, but in Germany and France. Our art exhibit will be exceptionally fine and the same thing can be said of our educational exhibit, but our industrial and machinery show may not be so excellent. We are afraid of your tariff. You see, we may show some things that are really good, and they may be copied. Now, if this was the case the manufacturer on the other side could not bring his goods in owing to the tariff and compete with the copy in your market."

CROP BULLETIN.
Returns Show the Area Under Winter Wheat to be 33,107,000 Acres.

Washington, May 11.—The monthly crop bulletin is issued by the agricultural department today is as follows:
Returns to the statisticians of the department of agriculture made up to May 1, show the area under winter wheat in cultivation up to that date to have been about 33,107,000 acres, or 2.36 per cent less the area sown last fall, and 4,255,000 acres or 15.34 per cent in excess of the area of winter wheat harvested last year. The percentage of abandoned acreage in all the important winter wheat growing states is unusually small, abandonment, including the area to be cut for hay, reaching 10,000 acres only in Kansas, Texas and California.
For the year remaining under cultivation the average condition on May 1, was 2.5 against a condition of 9.3 for the total area sown reported on April 1, 1903, and 7.4 on May 1, 1902, 9.4 at the corresponding date in 1901 and 9.5, the mean of the averages of the last ten years for the area remaining under cultivation on May 1. While there has manifestly been some deterioration of condition during the month, special reports on winter wheat states on May 1, report the wheat crop as practically uninjured by the cold snap.
The following table shows for the states the average of condition on May 1, the corresponding averages for the last ten years, and the mean of the corresponding averages for the last ten years:

State	May 1, 1903	May 1, 1902	May 1, 1901	Mean of last ten years
Kansas	9.5	9.7	9.7	10.6
Nebraska	8.2	8.5	9.1	10.2
Oklahoma	8.6	8.6	8.8	10.5
North Dakota	9.1	9.0	9.5	9.3
South Dakota	8.6	9.1	9.0	9.9
Texas	8.6	9.1	9.0	9.9
United States	9.2	9.3	9.4	9.5
